# Windows

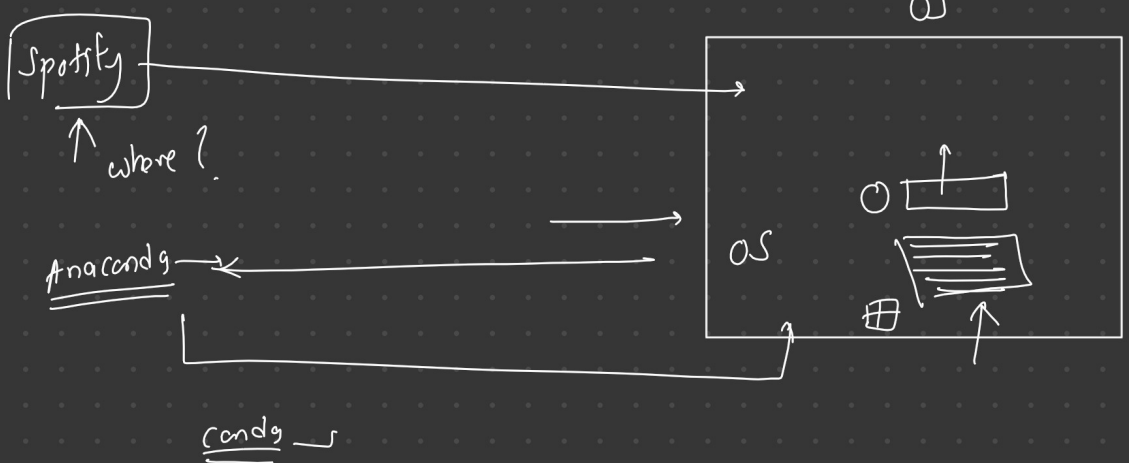

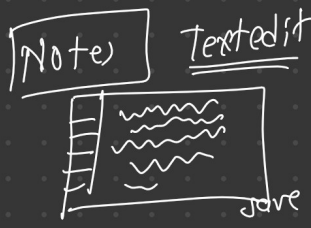

① issue : 'conda' is not recognized

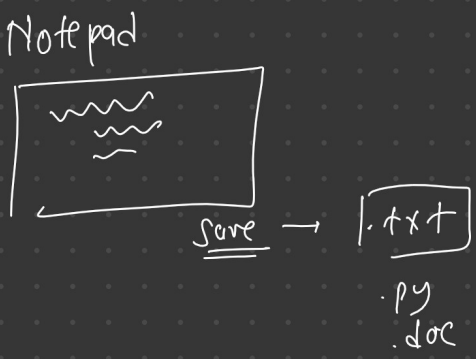

② Anaconda prompt

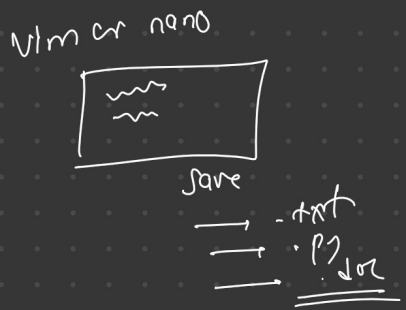

Terminal

(1) go to the location where miniconda/ anaconda is installed

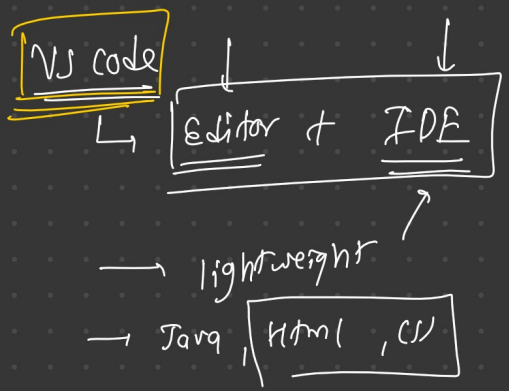

Editors

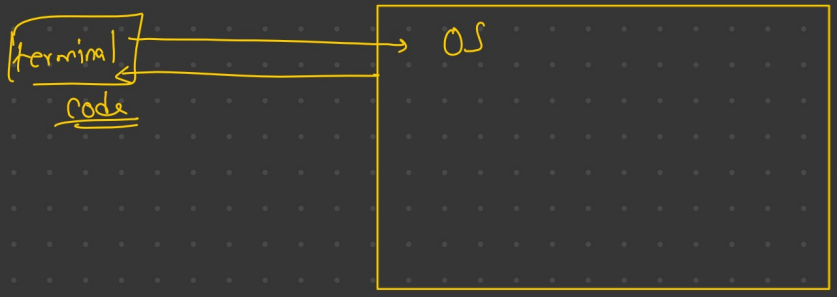

IDE → Integrated Development Environment

- Editor
- + ability to run code (test/debug)
- + more functionality (optional)

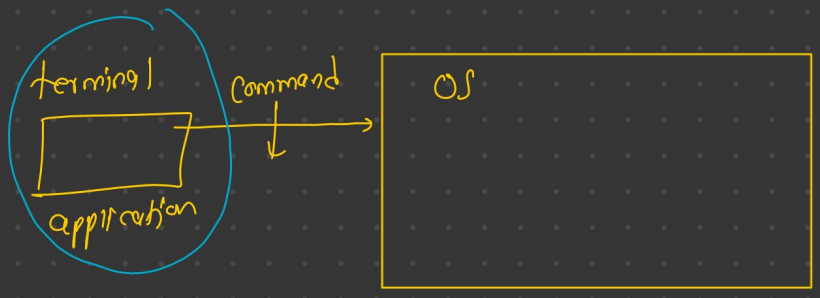

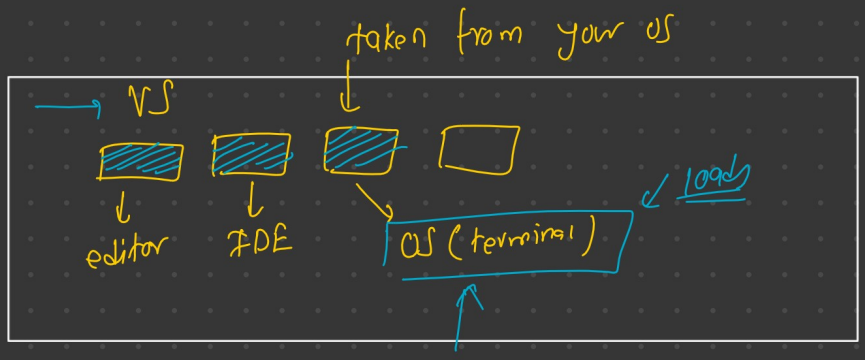

UI

Spotify → listen music

Notepad / similar → editing & writing

Chrome / brave / safari / firefox → browser → run webpage

Anaconda → python, data science + packages + more

relation

1. VS code → editor + ide

2.

3. google colab →
